

Control your Process

with real time data, you can make the right DECISIONS. Connect the DOTs today !

www.dzsupervision.com

DOT™

Easy to Install

DOT is easy to attach to any analog or digital signal.

Wireless²

No wires for data transmission, no wires for power.

Cloud Storage

No need to maintain servers. Your data is securely stored in the cloud.

About DZS - Industrial M2M

DZSupervision technology integrates your production lines into the global network in a simple and secure way. View your real time data from day zero installing pre-configured hardware or OPC client software. The acquired information is securely sent and stored in the cloud to be viewed from multiple devices. It works as a completely independent supervision system that does not interfere with your existing automation.
